Chief Executive Officer	Mr. Tran Cong Minh – Chief Executive Officer

General Introduction

MNT Company Limited, founded in 2010, brings Vietnamese manufacturing to Japan and the world. We supply everyday goods, household items and furniture, and we work alongside committed SME factories, training, guiding and upgrading them, so that every product meets Japanese quality at a competitive price and arrives on time.

With a deep understanding of Japanese culture and disciplined quality management to Japanese and international standards, MNT is one accountable partner from product development to delivery.

Mission · Vision · Values

MISSION

The standards of a large factory. The pricing of an SME factory.

Product quality is built through every detail, from the first step to the final finish. MNT works alongside dedicated SME factories, helping them raise their management capability, assure quality, deliver on time and reduce product defects, so that each factory creates more value and MNT's partners receive the right quality, the right price and on-time delivery. Across a network of more than 50 factories, including MNT's own, this is how we work every day. As a result, consumers can rely on the everyday products they use.

VISION

To be the most trusted partner bringing Vietnamese manufacturing to Japan and the world.

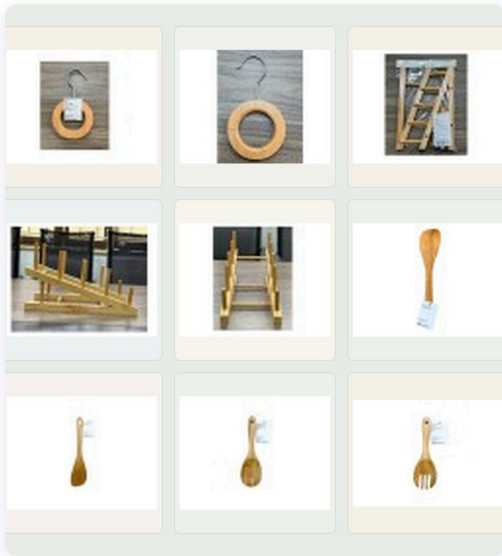

Lasting progress begins with small steps. We believe the strength of Vietnamese manufacturing lies not only in a few large factories, but also in many SME factories that are strengthened over time: small in scale, yet great in strength. MNT is building a network of high-quality, well-run, competitively priced factories, to support long-term partnerships with our customers.

VALUES

Trust as our foundation: quality assured from start to finish, costs kept stable, deliveries on time.

We hold fast to what we have promised. Quality, cost and delivery are always managed with discipline, responsibility and dedication to every order. We aim for good results for all three parties: our partners, our factories and the end customer. The Japanese call this sanpō-yoshi, good for all three.

Areas of Operation

01

Product development & sourcing

From a market need to a finished product: we turn practical ideas into useful goods with the right Vietnamese factory, and refine design, materials and cost together with our partners.

02

Quality, cost & delivery management

Japanese-standard control on the shop floor: we guide factories on management methods and manage quality, price and delivery together, so that expectations are shared from the first sample to the final inspection.

03

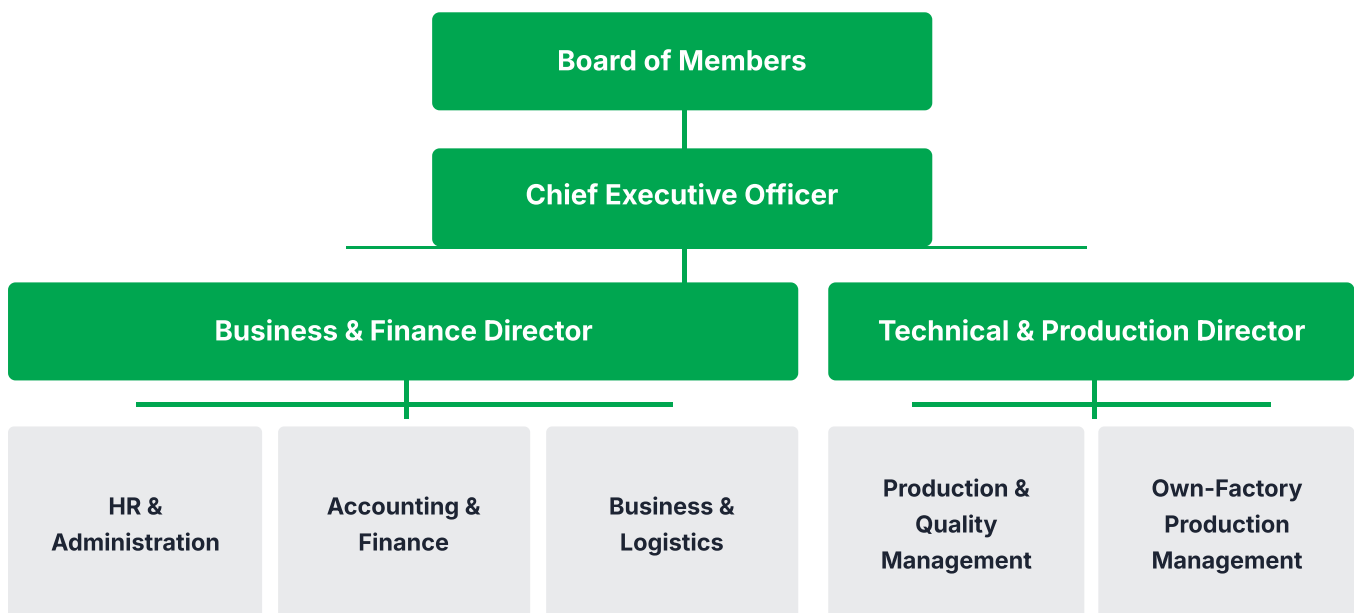

Export logistics & consolidation

Products from several factories are consolidated into single containers, enabling small, flexible orders and keeping shipping costs low, with one point of contact for the whole shipment.

Development Goals

- 1 Diversify products to bring more value and benefit to consumers.
- 2 Optimise logistics and improve efficiency across the supply chain.
- 3 Pursue sustainable development: protect the environment and fulfil our social responsibility.

Organisation Chart

Why Choose MNT

Large-factory standards. SME-factory value.

1

Our own production facilities

Our own wood, drain-net and towel factories give us direct control from raw material to finished product, for quality, convenience and care for the environment.

2

Understanding Japanese culture

We understand Japanese consumer habits and lifestyles, and develop products that fit Japanese standards and expectations.

3

A wide range, one partner

Eight product categories from more than 50 factories, from furniture and kitchenware to textiles, bags and agricultural supplies, under one accountable partner.

4

Experience in supply-chain operations

Years of experience in managing the supply chain let us protect quality, keep delivery promises and respond flexibly when plans change.

Certifications

FSC FSC Chain of Custody: traceable, responsibly sourced wood materials.

WCA WCA: workplace conditions assessment of the production site.

BSCI BSCI: assessment of responsible workplace practices at affiliated factories.

SMETA SMETA (4-Pillar): Sedex ethical audit covering labour, health and safety, environment and business ethics.

FDA FDA: US FDA registration for food-contact products.

Japan Food Sanitation Act Japan Food Sanitation Act: standards compliance for food-contact products, tested.

Applicability is confirmed for each relevant product and factory.

Quality Management Process

A four-stage quality management process—QP, QA, QC and QI—keeps requirements visible from planning through corrective action.

QP

STEP 1 · QUALITY PLANNING

Set quality standards to the customer's requirements and define how to meet them.

- Set quality goals
- Specify quality management methods
- Clarify responsibilities
- Plan the schedule of assurance activities
- Set goals for improvement measures

QA

STEP 2 · QUALITY ASSURANCE

Keep quality standards under close control at every stage, from market research and design to production and distribution.

- Market research & design review
- Production control
- Distribution & packing control

Quality Management Process

QC

STEP 3 · QUALITY CONTROL

Inspect and test to confirm that products meet quality and technical requirements.

- IQC: incoming quality control
- PQC: process quality control
- FQC: final quality control

QI

STEP 4 · QUALITY IMPROVEMENT

Keep improving product quality, guided by customer feedback.

- Collect feedback
- Root-cause analysis
- Corrective action with the factory

QP

QA

QC

QI

Quality is built step by step, down to the final finish.

Production Network

MNT coordinates its own factories and carefully selected affiliated factories across northern and southern Vietnam, matching each product to the factory best suited to make it.

How We Work With You

1

Brief

Share your idea, target price and quantity.

2

Factory match

We match the product with the most suitable factory in our network.

3

Quotation & sample

Feasibility, conditions, price and samples are confirmed with you.

4

Production & QC

Production under QP, QA, QC and QI, with on-site guidance.

5

Consolidation

Products from several factories are consolidated into one container.

6

Delivery

On-time shipment with one accountable point of contact.

Our Policy

For all our customers

With dependable quality

At a competitive price

Even for products we have not made before, please share your requirements. MNT will search Vietnam for the right manufacturer and confirm whether the product can be made and on what conditions. Quotations for new products may take a little longer; we welcome enquiries on any product.
